

ABSTRACT

A recording medium on which material information and a program are recorded for a user to create an original electronic album in relation to a sightseeing spot, wherein the material information is recorded with situational information, such as location, date, and time, added to information, such as text, images, audio, and maps related to this sightseeing spot, and the program is made to automatically or selectably display material information related to the situational information, such as location, date, and time, recorded with images and the like prepared by a user. Thus, it is possible to create an original electronic album by oneself relatively easily.
